Ghost Inu

About Ghost

Ghost Inu

Ghost Inu will give rise to the strongest meme coin ecosystem and community in the space. Boasting robust resiliency mechanisms and unique perks for holders, \$GHOST is poised to evolve into an enduring community-oriented protocol!

There are a few key aspects to \$GHOST. Most importantly, a proportion of transaction taxes will find their way into the treasury which will be used to acquire yielding NFTs and works from some of the most prestigious collections, granting our community the opportunity to share in benefits very few are able to enjoy!

Additionally, these yields will be utilized by our expert market maker who will strategically buy breakouts, hold support and add/remove liquidity as it is needed to optimise protocol health and sustainability!

This interpretation of NFT fractionalization will put Ghost Inu in front of some of the most established NFT communities, augmenting the growth of the protocol!

\$Ghost

GHOST is the ecosystem's native ERC20 token!

Token Name: Ghost Inu

Token Symbol: GHOST

ETH Contract: TBA

Initial Supply: 1,000.000.000.000

Distribution

Tokenomics

\$GHOST features a 14% tax on BUYS and 18% tax on SELLS to sustain, grow and reward the Ghost Army!

Dao funds allocated **6%** NFT portfolio & **4%** FTM farming on **Buys**.

Dao funds allocated **8%** NFT portfolio & **4%** FTM farming on **Sells**.

Ghost Inu

NFT Fractionalization

We have seen the success of fractionalizing NFTs through platforms such as fractional.art as well as individuals fractionalizing memetic pieces such as Doge NFT which reached incredible valuations.

Through our NFT portfolio, we will be fractionalizing multiple blue chip NFTs from some of the most significant projects in the crypto space, harnessing any yields and putting them back into the protocol to benefit the Ghost Army!

Ghost Inu yields APY from NFTs owned by the protocol, thus there is exposure to appreciation of the underlying asset. Not all are in a position to be able to own such exclusive pieces but by coming together we can reap their perks!

Ghost Inu

Ghost Inu

Our Secret Weapon: The Ghost Effect!

Meme coins with taxes generally fail when volume tapers as they can't sustain growth without new buyers. Ghost Inu uses yields generated from our NFT portfolio and farms to inject buy volume back into \$GHOST.

We are able to leverage the very best projects in the space that will continue to create passive returns even in periods of market downturn.

Our Secret
Weapon

Fantom Yield Farming

Ghost Inu

With over \$6bn total value locked, rapid settlement times and low transaction fees, Fantom Opera Network is the perfect place to generate yield on a proportion of Ghost Inu's treasury funds.

These yields will filter back into the ecosystem in the form of strategic buybacks as executed by our market maker.

Sit back, relax and have confidence in the protocol during periods of market volatility as our staked treasury funds serve to hedge against downside.

Fantom Yield
Farming

Market Maker

Ghost Inu

Ghost Inu will be the first meme coin protocol to make use of an expert market maker!

They will ensure longevity by defending against unsustainable price action using the funds generated by the protocol and our yielding strategies to strategically buyback the token.

Vesting Schedule

To ensure sustainability, presale participants will receive 25% of their purchased \$GHOST tokens on TGE with the remainder locked/vested through team.finance and unlocking weekly.

GHOST raised 10ETH from 40 contributors to be combined with 5ETH put forward by the Ghost Inu team for a total of 15ETH starting liquidity. Each contributor represents a maximum of 0.5% of supply.

In the interest of sustainability, presale participants will receive 50% of their purchased \$GHOST tokens on TGE with the remainder locked and vested through team.finance. Unlocks will be 12.5% of allocated tokens initiated biweekly via a smart contract.
